DRESSED FOR SUCCESS

Success makes fresh ideas come to life. It requires free thinking, determination, innovation, passion, courage and commitment to excellence. Success is our thing, our lifestyle, our way of thinking. That is why Softreflector exists.

Free thinking - With a young, enthusiastic and creative team Softreflector has the ability to think outside the box, creating solutions where others see only problems. This is at the heart of everything we do, and we lead others because of it.

Determination - Big goals and a desire for success are nothing without determination. This is our way of thinking, and it has made Softreflector known all over Europe. We promise it, and we act by it.

Innovation - Our innovative design and production methods have changed reflectors forever. No longer just a reflector, but a growing range of accessories to match a persons own thinking and individual style!

Passion - We enjoy what we do and we want others to enjoy it too. We are passionate about our products and our aim is for that passion to be infectious.

Courage - Daring to try new things is an important part of what we do. It keeps us fresh, keeps us successful, and keeps us in front. If something hasn't been done before, it doesn't mean it can't be done. Where others say "no", we dare to say "Yes!"

Excellence - Mediocrity is not in our language. Everything we do is aimed at producing excellence and doing so consistently without compromising the safety of our products.

Reflective Zip Pullers

- Developed and copyrighted by Softreflector LLC
- An original give-away item
- Highly Reflective*
- Small & Discreet
- Good exposure for the logo
- 2 pcs in a bag
- Standard inlay card included

* The Zipper Tag is made from the best reflective material and it reflects well in the dark. However since its small size it is not classified as a visual safety product. We recommend the Zip Tag as an additional help to any EN13356 certified item.

DESIGN YOUR OWN SHAPE!

We gladly make reflectors in your own shape design. In order to meet the European CE13356 standard, we are required to check your design for compliance, and make any necessary adjustments. The cost of producing your custom shape is directly affected by this compliance check, so an accurate price can only be given once we have received artwork for your shape. Custom shapes require new moulds to be created and because of that, a slightly longer order period is usually required.

CE EN 13356 & PATENT CERTIFICATES

Our pricing is based on A, B, C, D, E and F level which makes the price calculations for the client much easier. We don't ask for any "extra" charges for colours, printing preparations etc. The price which is stated in the pricelist is the price you'll pay. Softreflector's mould charge is much more affordable than our competitor's.

BUT we can't tell you all our benefits and secrets in our catalogue, so for more info , visit our website www.softreflector.com; contact by e-mail: assistance@softreflector.com or just call us: +372 6585921

© Design is protected by Copyright - product only available from Softreflector.
* Product is not compliant to EN13356 standard and must not be sold as such.

FACTORY

Softreflector is definitely most innovative and developed producer in visual safety production. We are the leaders in this industry, our knowhow is so big, that we educate governmental organizations about the evaluation of quality but also in new, upcoming trends and products. Number of employees 30-40.

Producing visual safety items involves a huge amount of responsibility towards keeping people alive, therefore its been a principle to have very strict quality control on every tiny detail. This can be executed only by doing all procedures "in-house". Not least important are the materials that we use. SR uses only US, European, Japanese or South-Korean materials in production. SR has spent years in finding suppliers that match in their quality and highest standards. All materials have been tested and have all necessary compliance certificates.

ABOUT Us

The company started active production in August, 2003 and is located in Europe, Estonia. The idea was and still is to offer reflective products which look innovative and trendy. Yes, there were many reflector producers before us but our way of thinking and producing was totally different. We are the first reflective product's factory who produces the products from zero to the end: starting from making the moulds for the custom shapes, making the digital imprint, ending with packing and sending the goods out. Also, we were the first producer who started to make digital imprint - before us, only silk screen was offered.

We took the "reflector" industry to the next level as we don't buy in any services - this makes us independent, quick and gives us a total control of our products quality.

Nowadays, the reflector is not just an obligatory item which is required by government, it's also an expression of person's lifestyle as its trendy accessory too. Even though our products look trendy, our quality hasn't suffered at all. All our products which are meant for personal safety are made of 3M Scotchlite material and of course are CE EN13356 certified. We are one of the few "reflector" producers, who does not give any "discount" to the quality - everything we do we do the best!

Copyrights ©

We value intellectual rights highly and expect others to do the same in respect to our products. Please note that the "©" signs accent that the product is created and copyrighted by Softreflector and available only from us.
